

SUMMARY

Computer Science Engineering graduate with hands-on experience in UI/UX design, including wireframing, prototyping, and end-to-end user flow design in Figma. Skilled at designing user-centered mobile experiences for real-world problems and translating concepts into responsive front-end code with HTML, CSS, and JavaScript. Seeking an entry-level UI/UX Designer role to apply design thinking, visual design, and usability-first problem solving.

TECHNICAL SKILLS

- Design

: Wireframing, Prototyping, UI Design, User Flow Design, Visual Design, Information Architecture, Accessibility, Responsive Design
- Design Tools

: Figma (Auto Layout, Components, Prototyping), Canva
- Front-End

: HTML, CSS, JavaScript (Basics), Tailwind CSS
- AI Tools

: ChatGPT, Claude, Google AI Studio, Google Stitch, Perplexity AI
- Developer Tools

: VS Code, Git, GitHub, IntelliJ IDEA
- Soft Skills

: Problem Solving, Communication, Adaptability, Time Management, Quick Learning

EDUCATION

- Gnanamani College of Technology

2022 – 2026

B.E. Computer Science and Engineering (CGPA: 8.2)

Namakkal, Tamil Nadu
- Sps Matric Hr Sec School

2020 – 2022

H.S.C / Percentage: 76 %

Salem, Tamil Nadu

PROJECTS

- SaveHER – Women’s Safety App

UI/UX Case Study – Figma

Behance

• Designed an end-to-end UI/UX case study for a women’s safety app, exploring how emergency help can be triggered faster without unlocking the phone.

• Designed the full user journey across 14+ screens: onboarding, login, home dashboard, SOS emergency, trusted contacts, and profile & settings.

• Conceptualized an Emergency PIN feature for triggering emergency actions quickly, prioritizing speed and minimal friction in critical situations.
- Mood-Mate

UI/UX Case Study – Figma, HTML, CSS, JavaScript

Behance

• Designed a mood-tracking and emotional well-being app end-to-end, from low-fidelity wireframes to high-fidelity prototypes in Figma.

• Defined user flows for mood logging, history, and insights, prioritizing simplicity and minimal friction for daily use.

• Built an interactive prototype to test navigation and validate the overall flow before implementation.
- Copyright Risk Analyzer Pro

React, Tailwind CSS, Framer Motion, AI APIs

Source

• Designed the interface for an AI-powered tool that scans multi-format content (text, image, video, audio) for copyright risk before publishing.

• Focused on making a technically complex workflow easy to follow: drag-and-drop upload, real-time analysis feedback, and a clear risk-scoring dashboard.

• Used animation (Framer Motion, Three.js) purposefully to communicate processing states and results, not just for decoration.
- Personal Portfolio

HTML, CSS, JavaScript, Tailwind CSS

Source

• Designed and developed a responsive personal portfolio with a clean, modern interface to showcase projects, technical skills, and professional achievements.

• Implemented a mobile-first, fully responsive layout to ensure a consistent user experience across devices.

• Improved information architecture and navigation, enabling recruiters to quickly access projects, skills, and contact details with minimal effort.

EXPERIENCE

- Web Developer Intern

Jul 2025 – Aug 2025

OPTIMUS TECHNOCRATES (INDIA) Pvt Ltd

Salem, Tamil Nadu

• Completed a one-month internship in web development, gaining practical exposure to building responsive applications and understanding end-to-end development workflows.

• Designed and developed web interfaces using HTML, CSS, and JavaScript, focusing on performance, usability, and modern UI practices.

• Collaborated on project tasks, improving debugging, problem-solving, and communication skills.

ACHIEVEMENTS

- 1st Prize – Paper Presentation, AVS College of Technology (2025): Link

• Python Course – Cybnernaut (2024): Link
